Subject: EPA Oil and Grease Analysis

It appears that from our discussion, you folks had the correct information for the new analysis. Thanks for bearing with me to make sure you were not going in the wrong direction.

I spoke with the chief chemist at EPA region 9 laboratory. The required method is 1664 and it is available on the EPA web site:

<http://www.epa.gov/region09/qa/analyt-m&r.html>

The new method uses hexane. I asked if you could use petroleum ether, and he said that it was not an acceptable substitute.

Carl G.
